CARLI | Consortium of Academic and Research Libraries in Illinois

Access to *Saskia Art Images* and *Sanborn Maps of Illinois, 1867-1970* collections from CARLI after April 10, 2019

History of Access

Due to contractual obligations, the images in these two collections are only available to users of CARLI governing member libraries.

The authentication mechanism for these two collections has changed with the move to OCLC-hosted CONTENTdm:

Before the migration to OCLC-hosted CONTENTdm, all users anywhere in the world were able to search/browse the collections. All users could see thumbnail images in search results or when browsing. When a user tried to view an item and its metadata, the system would check their IP address to determine if they were authorized. If so, they were allowed access to the item and its metadata, including the link to download a full-resolution image. If they were not authorized by IP, users were presented with a page that said off-campus access was not available.

Beginning April 10, 2019, after the migration to OCLC-hosted CONTENTdm, users coming from a known IP and accessing the collections through the CARLI CONTENTdm EZproxy URLs will be allowed to search/browse for items in Saskia or Sanborn, see the thumbnails/items/metadata, and download full-resolution images. Users from an unknown IP and/or not accessing the collections through the CARLI CONTENTdm EZproxy URL will be able to search all of CARLI Digital Collections and see results from the Saskia and Sanborn collections--including item metadata--but will not be able to see thumbnails, the item image, or download a full-resolution image.

Access through library proxy servers

If your library provides a link to all of CARLI Digital Collections through your proxy server, please contact CARLI Support at support@carli.illinois.edu to make sure that we know your specific proxy server IP. It is not enough that it may be part of a range already provided to CARLI for access to electronic resources; for Saskia and Sanborn collections access, we need to know your proxy server's individual IP address.

Access to *Saskia Art Images* and *Sanborn Maps of Illinois, 1867-1970* collections

If your library provides links directly to the Saskia or Sanborn collections' **Browse pages** from your library home page or through your local proxy server, you will want to update your links to include the CARLI EZproxy prefix:

https://carli.idm.oclc.org/login?url=

to ensure the best experience for your authorized users. For example:

https://carli.idm.oclc.org/login?url=http://collections.carli.illinois.edu /cdm/search/collection/sanborn

https://carli.idm.oclc.org/login?url=http://collections.carli.illinois.edu/cdm/search/collection/saskia

If you provide links directly to the Saskia or Sanborn collections' **Home pages**, no changes are needed. Links within that page to browse or search the collection have been updated to include the CARLI EZproxy prefix already.

If you have any questions, please contact CARLI Support at support@carli.illinois.edu.
