IDforDeduplication: Notice how the IDforDeduplication is the same number for these three rows. This means that these three rows represent a single patron request.

YourLibBIB_ID: The value in each of these rows is different, meaning that your library had three BIBs where the record had the same NORMAL_HEADING 2450 value. In the case of this request, since the title and author are the same, it is likely the same work.

RequestNetworkNumber and **YourLibNetworkNumber:** Notice that the OCLC number for the item the patron requested matches one of the OCLC numbers in one of your library's bibs. Your library does have an exact copy of the item requested by the patron.

RequestPubDate and **YourLibPubDate:** These values can help you determine which edition or publication year the patron requested, vs. the edition/publication year owned at your library. For some requests the publication year may matter more than others.

NORMAL_HEADING_2450: These three results all have the same normalized title. Using other information about the title, such as author, publisher, publisher date, and OCLC number can help you confirm a match.
